

HEALING ARTS SCHOOL MASSAGE THERAPY PROGRAM FALL 2018

MISSION & COURSE CURRICULUM

Downtown Yoga & Healing Arts School (DTY) has developed a Massage Therapy Program to embrace the entire system of the therapeutic arts. Our students are trained and exposed to a wide

spectrum of Healing Arts that embody the principles of Natural Therapeutics.

Our mission is to create caring, ethical, balanced massage therapists that understand the interconnected nature of the mind, body and spirit.

Our program was created with the upmost integrity and intention to offer a program that effectively balances modern-western and traditional-eastern health philosophies and techniques.

Students will be immersed in massage theory and practice, therapeutic and holistic massage technique, ethics and boundaries, client assessments, clinical documentation, and solid business skills to manage a thriving practice. DTY School of Massage is unique in that it offers both therapeutic and holistic/eastern studies within one program with optional "specialty" trainings for those interested in expanding their massage repertoire. Our school also uses a formidable amount of the required hours for hands-on clinical experience understanding that the art of "doing" is truly what inspires confidence, skill, and talent.
